

Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect those documents are requested to call ahead on (202) 690-2817 to facilitate entry into the reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Jeanette Greenberg, Technical Writer-Editor, Center for Veterinary Biologics, Licensing and Policy Development, VS, APHIS, USDA, 4700 River Road Unit 148, Riverdale, MD 20737-1231; telephone: (301) 734-5338; fax: (301) 734-4314; or e-mail: Jeanette.B.Greenberg@usda.gov.

SUPPLEMENTARY INFORMATION: Under the Virus-Serum-Toxin Act (21 U.S.C. 151 *et seq.*), a veterinary biological product must be shown to be pure, safe, potent, and efficacious before a veterinary biological product license may be issued. A field test is generally necessary to satisfy prelicensing requirements for veterinary biological products. Prior to conducting a field test on an unlicensed product, an applicant must obtain approval from the Animal and Plant Health Inspection Service (APHIS), as well as obtain APHIS' authorization to ship the product for field testing.

In determining whether to authorize shipment and grant approval for the field testing of the unlicensed product referenced in this notice, APHIS conducted a risk analysis to assess the potential effects of this product on the safety of animals, public health, and the environment. Based on the risk analysis, APHIS has prepared an environmental assessment (EA). APHIS has concluded that field testing the unlicensed veterinary biological product will not significantly affect the quality of the human environment. Based on this finding of no significant impact (FONSI), we have determined that there is no need to prepare an environmental impact statement.

An EA and FONSI have been prepared by APHIS concerning the field testing of the following unlicensed veterinary biological product:

Requester: Tri Bio Laboratories, Inc.

Product: Marek's Disease-Newcastle Disease Vaccine, Serotypes 1 and 3, Live Marek's Disease Virus Vector.

Field test locations: Wisconsin, North Carolina, and California.

The above-mentioned vaccine is for use as an aid in the prevention of Marek's disease and Newcastle disease in chickens. In this vaccine, the live vector is Marek's disease serotype 3 virus, also known as turkey herpesvirus, a nonpathogenic virus in widespread

use as a poultry vaccine since 1972. Genetic engineering procedures were used to insert into the vector virus two genes from Marek's disease serotype 1 virus and two genes from the Newcastle disease virus.

The EA and FONSI have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Unless substantial environmental issues are raised in response to this notice, APHIS intends to authorize shipment of the above product for the initiation of field tests 14 days from the date of this notice.

Because the issues raised by field testing and by issuance of a license are identical, APHIS has concluded that the EA and FONSI that were generated for field testing would also be applicable to the proposed licensing action. Provided that the field test data support the conclusions of the original EA and FONSI, APHIS does not intend to issue a separate EA to support the issuance of the product license, and would determine that an environmental impact statement need not be prepared. APHIS intends to issue a veterinary biological product license for this vaccine following completion of the field test provided no adverse impacts on the human environment are identified and provided the product meets all other requirements for licensure.

Authority: 21 U.S.C. 151-159.

Done in Washington, DC, this 13th day of May 1999.

Joan M. Arnoldi,

Acting Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

National Defense Stockpile Market Impact Committee Request for Public Comments

AGENCY: Office of Strategic Industries and Economic Security, Bureau of Export Administration, U.S. Department of Commerce.

ACTION: Notice of request for public comment on the potential market impact of proposed disposals of excess commodities currently held in the National Defense Stockpile.

SUMMARY: This notice is to advise the public that the National Defense Stockpile Market Impact Committee seeks public comment on the potential market impact of Department of Defense proposed new material disposal of zirconium ore, from the Stockpile under the Fiscal Year 1999 Annual Materials Plan (AMP). The Committee also seeks public comment on the Department of Defense plan to increase its current disposal levels for Vegetable Tannin Extract (Quebracho) and Thorium Nitrate under the AMP.

DATES: Comments must be received by June 18, 1999.

ADDRESSES: Written comments should be sent to Richard V. Meyers, Co-Chair, Stockpile Market Impact Committee, Office of Strategic Industries and Economic Security, Room 3876, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, D.C. 20230; FAX (202) 501-0657.
